SUMMARY

Having recently graduated with a Bachelor of Arts degree, I have ventured into the realm of technology, immersing myself in full-stack development and digital marketing. My journey commenced by mastering the C language, which served as the cornerstone for my foray into the tech field. Specializing in front-end development, I have refined my expertise in crafting user-centric interfaces. Proficiency in WordPress has empowered me to construct robust websites. Presently, I am deepening my knowledge in back-end development to complement my full-stack proficiency. Concurrently, I am enhancing my digital marketing skills, encompassing SEO, to cultivate a well-rounded skill set in the digital domain.

SKILLS

- HTML
- CSS
- Bootstrap
- JavaScript
- WordPress
- PHP
- SEO
- My Sql

PROJECTS

Food Recipe - CSS

This project has been made by combining HTML & CSS, some buttons have also been added for the user or it has been made user friendly. With this icon, images have been added and details of the last main owner have also been added.

Fresh Food - Bootstrap

This project has been created using HTML, CSS & Bootstrap. It has been created like a food delivery site and by adding modal to it, it has been given the information to be passed to the user and in it, a form has been given to give a user feedback. For first and second orders, it has also been made responsive and a carousel has also been added to it. Last is the company logo and details.

JavaScript

Calculator

This calculator is made with the help of HTML, CSS & Javascript and its buttons have been created using table tag, which also includes All cut button and Single cut button, which is simple and user-friendly.

Tic-Tac-Toe

"Developed a responsive Tic-Tac-Toe game using HTML, CSS, and JavaScript. Implemented functionality for two players, with dynamic turn switching and win detection. Utilized modern web techniques for a visually appealing user interface. Incorporated reset and new game options for enhanced user experience."

10 Miracles with divine miracles - WordPress

This is a phased project which is being run live. I have created this project with WordPress. This project has tried to make a website like "Divine Miracles" a clone of a website and has also included youtube videos and website related photos. Along with this, its pages have also been linked to other pages or links have also been attached on top of them. website link is here -- <http://digitalabhimanyu.rf.gd/?i=1>
